Pacer Vaulting Poles Calibrated using the BestFlex® System

BestFlex® Rating System

All Pacer, Skypole and Ms.Stic vaulting poles are calibrated using the BestFlex® System which ensures the most accurate flex rating available for the easiest transition between poles. Before using any pole, consult the BestFlex® rating chart which accompanies poles from Gill Athletics to determine if the pole is suitable for use. *Never use a pole with a body weight rating lower than the athlete's body weight. Vaulting poles are not guaranteed against breakage.*

Vaulting Pole Manufacturing

involves the highest quality materials, a patented double spiral wrap application process, and a testing procedure that has been perfected over decades.
